

Md Sohanur Rahman

Backend Software Engineer

mdsohanurrahman63@gmail.com | +880 1738978705 | github.com/rahman-sohan | Pabna, Bangladesh

PROFILE

Backend Engineer with 3+ years building scalable, high-traffic systems in Node.js, NestJS, and TypeScript. Delivered production systems across travel-tech (3M+ hotel records, Elasticsearch → MongoDB migration), AI-powered matrimony (pgvector semantic search, real-time chat), and multi-tenant property management. Strong track record integrating third-party APIs (Stripe, Travelport, RateHawk, Twilio) and deploying on AWS and Azure.

PROFESSIONAL EXPERIENCE

Walima Ltd (Durbin Inspiring Limited)  , Software Engineer - (Hybrid) Jul 2025 – Present | Mirpur DOHS, Dhaka
"AI-powered matrimony platform focused on intelligent matchmaking and meaningful connections."

- Built a hybrid matchmaking engine combining weighted scoring across 8 compatibility dimensions with pgvector semantic search, reducing irrelevant match suggestions by an estimated 35%.
- Designed and implemented BullMQ async pipelines and Redis caching layer, improving average API response time for recommendation feeds.
- Developed real-time chat system and multi-channel notification service (Firebase FCM, Twilio SMS, Nodemailer) serving active user base.
- Integrated Stripe subscription and payment flows with webhook handling, supporting multiple plan tiers and automated billing.
- Set up AWS S3 media storage, Sentry error monitoring, and role-based admin management with fraud detection rules.

Tech: NestJS · TypeScript · PostgreSQL · Redis · pgvector · BullMQ · Stripe · Twilio · AWS S3

Sharetrip Ltd.  , Software Engineer- (On site) Apr 2023 – Apr 2025 | Bashundhara R/A, Dhaka
"First & leading all in one travel solution company in Bangladesh."

- Optimised hotel search across 3M+ records using MongoDB autocomplete and geoSearch with 2dsphere indexing, cutting average search latency by ~40%.
- Led backend migration from Sails.js to NestJS and database migration from Elasticsearch to MongoDB, improving maintainability and reducing infrastructure cost.
- Integrated RateHawk and Travelport APIs to enable two-way hotel distribution between local and international partners for B2B and B2C platforms.
- Built and maintained services for hotel booking, payments, refunds, and authentication used by hundreds of daily active business clients.

Tech: NestJS · Node.js · TypeScript · MySQL · MongoDB · Redis · RateHawk · Travelport

ScaleBridger Corp.  , Backend (TypeScript) Developer - (Part time) Apr 2025 – Mar 2026 | Austin, Texas 78731, USA

- Built a multi-tenant property management REST API using Node.js, TypeScript, Express, PostgreSQL, and Sequelize with JWT authentication and RBAC.
- Developed a Socket.IO  real-time booking chat system supporting text, templates, and attachments for communication between tenants and property managers.
- Integrated Azure Blob Storage for document/media uploads, Twilio SMS for booking alerts, and SendGrid for transactional email notifications.

Tech: Node.js · TypeScript · Express · PostgreSQL · Sequelize · Socket.IO  · Azure Blob · Twilio · SendGrid

EDUCATION

B.Sc. (Engg.) in Computer Science and Engineering, University of Rajshahi 2017 – 2022 | Rajshahi, Bangladesh

SKILLS

Language and Frameworks

Node.js, Nest.js, Express.js, JavaScript, TypeScript

Database

PostgreSQL, MySQL, MongoDB, Redis

API Integration

RateHawk, Travelport, Guesty, Stripe, Twilio, Firebase Cloud Messaging (FCM)

Tools & Technologies

REST APIs, Git, Docker, Linux, RabbitMQ, TypeORM, Prisma, Mongoose, Elastic Search, Swagger

AWARDS

ITEE FE Full-Passer Exam-2021, Examinee Number :- FE02-0054 | Achieved 26th position in Bangladesh

PROBLEM SOLVING

Solved More than 500+ programming problems in different online Leetcode  , LightOj  And participate contest in Codeforces  and vjudge
